Synopsis:

Sybille Malone lives in an overpopulated Manhattan, Region One, of Global Good 2202. Their society is the fulfillment of utopian ideals developed by the surviving masses of 2100. Seventeen-year-old Sybille is a resident of Dayshift and longs for a Nightshift boy known only as Mark.

Distraught by Global Good's restrictive culture, Sybille is desperate until she finds a relic of a past civilization. The discovery of Blair's diary sets off a chain of supernatural events that not only affects Sybille's close relationships, but has Global Good scrambling to find the culprit.

The St. Blair series is author Emily Skinner's first YA series.

Praise for St. Blair: Children of the Night:

" I have just recently finished reading this novel and I was entirely impressed! I was completely absorbed in it until the very end!!! There are so many questions you ask yourself throughout reading this book, and at the end those questions get answered with surprise!" – *Amazon Reviewer*

" This is an incredibly well written and thought provoking story. Both its dystopic setting and biblical prophesy made this story impossible to put down!" – *GoodReads Reviewer*
